

PAJUNK®

Paediatric Anaesthesia

*Cannula systems for caudal,
epidural, and plexus anaesthesia*

Paediatric anaesthesia

Fine and precise

The PAJUNK® Special Program for Paediatric

As manufactured of various specialty cannula, PAJUNK® offers a complete product line designed specifically for paediatric anaesthesia in

regional anaesthesia. We offer high quality cannula for caudal, spinal, epidural, and plexus anaesthesia.

Caudal Anaesthesia

SPROTTE® 27 G

The SPROTTE® has initiated a worldwide trend to atraumatic puncture, which has proven itself in paediatric anaesthesia applications as well.

Crawford cannula 23 G, graduated, with depth stop

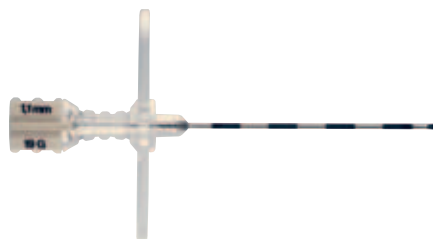

The Caudal cannula with its cone point geometry according to Crawford has proven to be particularly suitable in paediatric puncture.

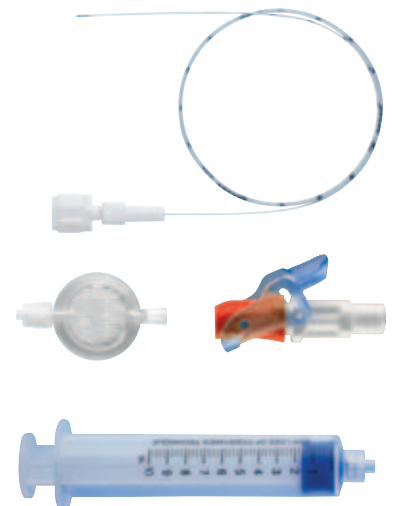

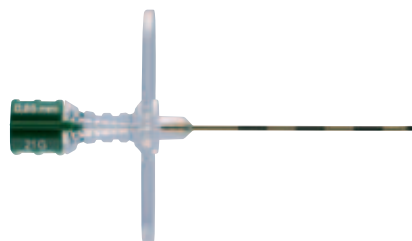

Epidural Anaesthesia

PAJUNK® produces two special types of cannulas for Epidural anaesthesia:

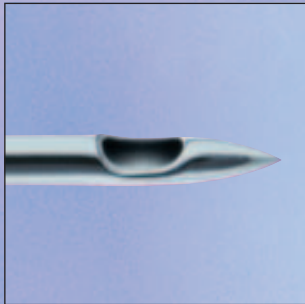

With the well proven Tuohy tip:

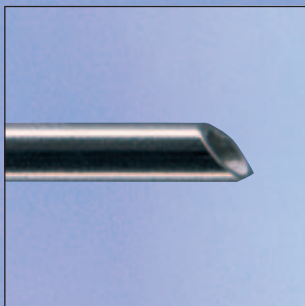

According to Marhofer with the well proven Tuohy tip:

The Paediatric set was developed in cooperation with Dr. Marhofer.

ric Anaesthesia

Plexus Anaesthesia

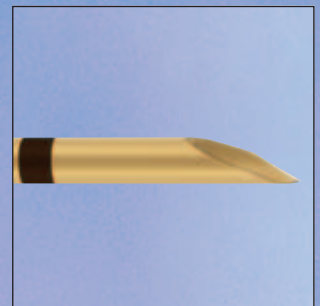

UniPlex NanoLine cannula „Single Shot“: (UP/UPS) cannula

The UniPlex NanoLine cannulas were developed by PAJUNK® specifically for the disposable application in the peripheral conductive anaesthesia. These cannulas come in many different gages and sizes. PAJUNK® understands the growing trend of this application in paediatric anaesthesia so we offer two versions a SPROTTE® tip and a Facet tip with a shorter lengths and very small gages.

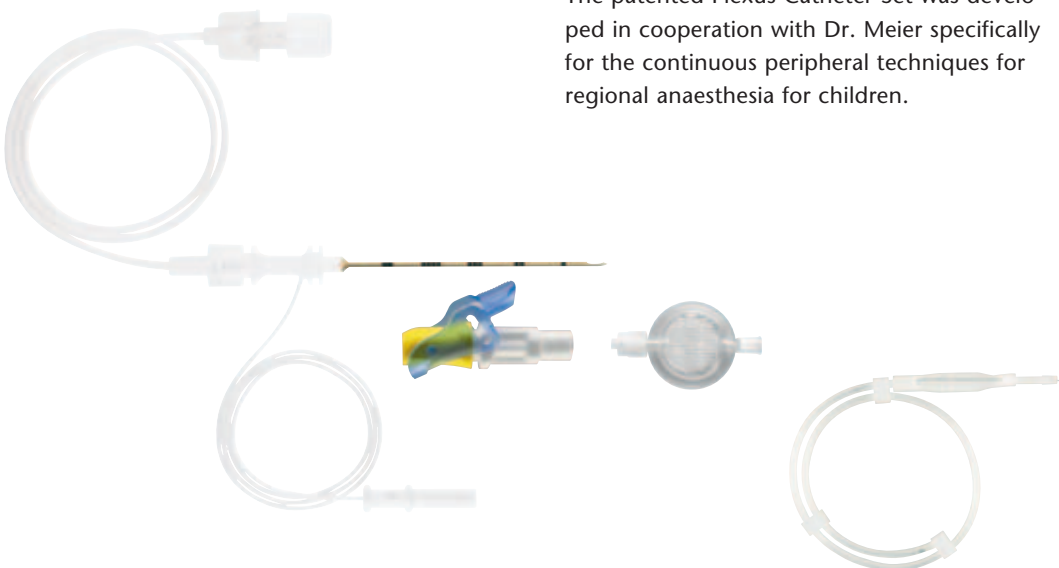

SPROTTE® tip

Facet tip

PlexoLong NanoLine according to Meier „Catheter Technique“

The patented Plexus Catheter Set was developed in cooperation with Dr. Meier specifically for the continuous peripheral techniques for regional anaesthesia for children.

SPROTTE® SPECIAL tip

Caudal

Product	Size	Item No.	PU
SPROTTE® cannula	27 G x 35 mm	111151-27A	25
SPROTTE® cannula	25 G x 35 mm	001151-29E	25
SPROTTE® cannula	24 G x 35 mm	001151-30E	25
SPROTTE® cannula	22 G x 50 mm	071151-30C	25
Crawford cannula	23 G x 25 mm	1149-12D025	25
Crawford cannula	22 G x 40 mm	1149-12E040	25

Epidural

Product	Size	Catheter	X-ray contrast catheter Guide 0,2 µm flat filter Tuohy Borst adapter LOR syringe	Item No.	PU
