

AERATOR

Aerating of turf areas, grassland and fields - is becoming increasingly vital, to overcome the hardpan caused by vehicle and human traffic which otherwise inhibits healthy growth, moisture penetration and fertiliser uptake.

Puddles are efficiently drained and the slits will remain functional for a long time, without visual scars. Full width rear roller with dual function of depth control setting and turf restoration, leaving minimum surface disturbance.

HOWARD's solution, i.e. fast-rotating slitting blades producing clean verti-cuts to a depth of 15cm with 12cm distance between the slits is one of the most effective methods available.

Specification	HRA 26/180	HRA 26/205
Working width, cm	180	205
Slitting rows	15	17
For tractor hp	30-80	
Rotor speed, rpm	162-248	
Weight, kg.	390	430

Notes:

Continuous R&D may result in changes of specification for the latest model delivered.

Howard in ASIA since 1962
