

# POST HOLE DIGGER

HOWARD's Post-Hole Diggers are labour-saving implements for erecting masts, poles, signs, fences and are increasingly used in tree-crop replanting programmes. Seedlings grown in planting bags in nurseries are transplanted into pre-bored holes, with speed and accuracy.

Spring loaded stabiliser bar ensures vertical penetration. Double auger spiral (above 9") for efficient soil displacement. PTO Driveshaft with Shearbolt Torque Limiter. For holes less than 20" diam., the PHD 35 is extremely cost effective. The Owner's Manual supplied with each machine contains guidelines on adjustment of cardan tubes to suit tractor linkage as well as comprehensive operational and maintenance instructions.

Specification	PHD 45
Tractor hp, recommended	35-85
3-point linkage, CAT	I/II
Boring depth, max (cm)	90
24Hole diameter, max	24"
Weight, kg. (excl. auger)	290
Augers	12" 18" 20" 24"
